WORK EXPERIENCE & PROJECTS

- 2007 + **How much water has the Sabancı University Lake left?**
(A Sabancı University Freshman Project)
 In this project we've develop a system in order to measure the amount of water in the SU Lake. We've placed a device above the lake in an appropriate place. This device is to take periodicmeasurements of time and height. After this, by a data server, these periodic measurements are to be recorded and passed onto a web site through which is to be able to observed. All thesystem works stand alone.

BIO

Kutay Chelenk is a single son of an art- historian mother and a general surgery professor father. His journey has started at the age of 6 as he first met with his first personal computer Commodore64. Throughout his childhood, Kutay was pretty passionate about drawing, plastic arts; and very talented about crafts. Possibly he owes his skills to his parents that never set limits in his daily life. After finishing High school, Kutay entered Sabancı University 2006. His course works were to become the samples selected by his tutors like Murat Germen as to be demonstrated for the future students. His studies on ActionScript in the senior year led him to create his first Flash games on a touchscreen platform. Kutay had completed his military service in the following year, just after he deferred his future studies. In 2015, he had been accepted for the Sabancı MA program of Brand Practice. The feature that leads Kutay to the success is the way he appreciates the learning process instead of accomplishing. He wants to become a successful digital marketer as he develops his UX skills and combine them with his creative basis.

Kutay have travelled more than 15 destinations, and lived in Baltimore, MD. He is currently living in Istanbul as a freelance designer. He is a web design addict, and a freelancer at upwork.com. Owner of the shopping site popauctions.com
